

ALESSIO PINTO

Full Stack Software Developer

Genoa, Italy

(+39) 327 836 3979 | alessio.pinto02@gmail.com | alessiopinto.com | linkedin.com/in/alessio-pinto-595465334

SUMMARY

Full Stack developer with experience building web applications, integrating **RESTful APIs**, and creating **middleware (Laravel)**. Skilled in code **refactoring** and maintenance, database management, and optimization through **CI/CD** pipelines (**GitHub Actions**) and containerization (**Docker**).

EXPERIENCE

TWOW | Genoa

November 2025 - Present

Full Stack Developer

On-site curricular internship

- Designed and developed full-stack web applications in an agile environment, using **PHP (Laravel)**, **JavaScript (React)** and **SQL**, managed via **Git**.
- Developed and optimized middleware and **RESTful APIs** for secure and efficient client-server communication.
- Refactored, updated, and **maintained** existing codebases, ensuring high performance, stability, and accessibility of web services.

Applause | Genoa

July 2023 - Present

QA Tester

Remote

- Top **2%** tester with solid experience in **functional testing** and **regression testing** on web and mobile products.
- Identified and **reported bugs** with detailed reports, contributing to the quality of production releases.

Team Test Lead

June 2025 - November 2025

- Coordinated testing cycles, ensuring proper **workflow** of testing activities.
- Supervised and **reviewed** the quality of reports submitted by testers, verifying their completeness and reproducibility.

PROJECTS

TST Media Management | PHP, JavaScript, SQL, AJAX

- Developed a plugin to identify and safely manage unused media on sites with over **8,000 images**, with support for **ACF**, **WooCommerce**, **Gutenberg**, and **Polylang**.
- Designed a batch architecture with **4-step scanning** for shared hosting, a virtual folder system, reversible trash, **ZIP export** via WP-CLI, and recursive analysis of serialized data structures.

RESTful Web API | C#, .NET 10, EF Core, SQL

- Personal backend project built to deepen knowledge of **C# .NET** architecture, routing, and relational database integration.
- Implemented **CRUD** operations, database querying via **Entity Framework Core**, and applied object-oriented principles to backend logic.

SKILLS

Frontend: HTML, CSS, JavaScript, React, Next.js, Astro, TailwindCSS

Backend: PHP (Laravel), C# (.NET), Java, C, C++

Databases & DevOps: SQL, MongoDB, Docker, Git, GitHub Actions, Vercel

Tooling & Practices: Node.js, Vite, AJAX, Postman, WordPress, Unreal Engine, Unity

EDUCATION

ITS Accademia Digitale Liguria

November 2024 - In progress

AR/VR Game Developer

University of Genoa

September 2022 - August 2024

Computer Engineering

Status: on hold

IIS Majorana - Giorgi

September 2017 - June 2022

Computer Science and Telecommunications, Computer Science track

Grade: 94/100
